PROFESSIONAL SUMMARY

Functional Analyst with hands-on experience in requirements elicitation, Agile SDLC collaboration, and root-cause system troubleshooting, seeking to apply analytical and technical skills to drive process and product improvements.

EDUCATION

University of Houston

Bachelor of Science in Computer Science, Minor in Math, GPA: 3.70

Houston, TX

Aug. 2021 – Dec. 2025

EXPERIENCE

Functional Analyst Intern

Feb. 2025 – July 2025

Escher Group

Remote

- Gathered and elicited business requirements through regular meetings with product managers, QA testers, and business analysts, clarifying expected system behavior and resolving ambiguity before development began.
- Maintained regular communication with product managers and QA testers, providing status updates and presenting documentation and findings directly to stakeholders throughout the development cycle.
- Participated in an Agile SDLC, collaborating across sprints with developers and QA to evaluate feature changes against business requirements and identify edge cases prior to deployment.
- Re-engineered the documentation process by replacing static Word-based write-ups with Visio flowcharts, improving clarity and reducing time for teams to understand system workflows.
- Supported user acceptance testing by authoring detailed bug tickets that defined expected vs. actual system behavior, reproduction steps, and expected outcomes to give developers clear acceptance criteria.
- Investigated system failures across 20K+ endpoints, tracing root causes across application logic, data, configuration, and service interactions.

PROJECTS

HelpingHands | React, Node.js, Express.js, MySQL, Azure

Aug. 2024 – Nov. 2024

- Designed and implemented RESTful backend services handling real-time state updates and persistent data storage
- Developed optimized SQL queries and relational database schemas to support efficient data retrieval and application workflows.
- Built modular API endpoints supporting concurrent user interactions

EduCraft | React, Node.js, OpenAI API, Figma

May 2024

- Built asynchronous backend pipeline integrating external AI services with robust error handling
- Implemented API-driven request/response processing and optimized latency handling
- Designed an intuitive front-end interface in Figma, improving usability and satisfaction for 10+ test users

SubSync | React, Node.js, Express.js, Google Maps API

Jan. 2024

- Integrated external APIs and transformed inconsistent data sources into structured data models for reliable application workflows.
- Designed data transformation logic and structured models to ensure reliability across third-party integrations
- Improved request handling and response efficiency, increasing search performance by 60%

TalkToo | Node.js, Discord.js, OpenAI API

Nov. 2023

- Developed event driven service processing real time messaging events and automated responses
- Integrated the OpenAI API with Discord.js, increasing message response accuracy by 30%
- Improved engagement and interactivity for 20+ active users in Discord chatrooms

TECHNICAL SKILLS

Languages: SQL, Python, JavaScript/TypeScript, C/C++

Systems & Analysis: Root Cause Analysis, Log Analysis, Requirements Analysis, Workflow Analysis, Process Re-engineering

Databases: MySQL, Relational Database Design, SQL Query Optimization

Testing & Tools: Validation Testing, Regression Testing, UAT, Visio, Jira, Git, Azure, Excel

Technologies: REST APIs, Node.js, Express.js
